

AIR POWERED TORQUE WRENCH PUMPS

Powerkeg Air

The Powerkeg range of 700 bar high performance pumps designed specifically for hydraulic torque wrenches. Industry leading performance with fine tuned oil flow dynamics, provide optimum performance with power and speed.

- All new high efficiency pump design
- Ultra high performance
- Durable, lightweight and strong
- Optimum power to weight ratio
- Long life low maintenance
- Integrated heat exchanger

Global Joint Integrity Management Solutions

Features

- Durable and lightweight
- Ultra high performance capable of operating single or multiple tools in parallel
- Industry leading performance from 3-stage hydraulic pump, providing optimum performance for hydraulic torque wrenches with power and speed
- Overlay gauges calibrate the pump for all Hydratight torque wrenches
- Heat exchanger cools the oil and warms exhaust air to prevent freezing

- Ingenious round design significantly eases operator handling and ensures maximum accessibility to connection points
- Designed to satisfy continuous and prolonged operation in the most arduous conditions

Increased Productivity

- Long life
- Low maintenance
- High reliability
- Covered by a three year warranty

Specification

Hydraulic Pump Output (Stage 1)	7.5 l/m @ 80 bar
(Stage 2)	3.8 l/m @ 290 bar
(Stage 3)	1.0 l/m @ 690 bar
Oil Reservoir Capacity	10 litres
Dimensions	466 mm x Ø 375 mm
Complete Pump System Weight	30 kg (aluminium system without oil)
Hand Held Control Pendant Length	6 m standard (other lengths available)
Noise Level	82 dBA - 86 dBA (standard cycle)

For full weight add 1kg for each litre of oil

Number Reference

	Material Spec A = Alum (Std)	Coupling System P = Parker (Std) C = CEJN (Opt)		Part Reference
PA7S	A	P	=	PA7SA-P
PA7S	A	C	=	PA7SA-C

Standard Powerkeg pumps are listed without twin line hydraulic hose.
Stainless version available upon request
