Rental Services

Because ensuring a leak-free solution is critical. It has to be Hydratight.

For more than 100 years, Hydratight has provided world-class bolted joint solutions, assessing and managing joints to ensure leak-free start-ups. Today, we continue to set international standards in joint integrity – but we're so much more than just a bolting and on-site machining company.

Because even the tiniest leak can be costly and time consuming to repair, we manage every joint on a project for leak-free start-ups and production, which in turn removes the threat of environmental impact caused by unsafe joints. Safety continues to be the most important aspect of our business. We are a global organisation making a real difference to the industries and communities we work in, committed to improving safety, operational efficiency and uptime.

Because you require the support of an innovative partner committed to your success, we not only offer unrivalled service on a global scale, including customer training and software development; but also design and manufacture quality tools and equipment for bolted joint solutions to the highest standards. Our certified teams are dedicated to working closely with you, assessing and managing every joint on your project to prevent leaks from ever occurring, year in, year out.

Because you value safety and reliability, we work to ISO 9001, ISO 14001 and OHSAS 18001 standards in everything we produce from manufacturing torque and tension bolting equipment to mechanical connectors, from in-situ service to creating custom solutions in line with clients' specifications.

It means that whenever you need a complete joint integrity solution, whichever industry sector you're in, you can rely on us to get it 100% right first time, every time. **This is why it has to be Hydratight.**

Engineering Driven Safety Focused Solutions

Equipment Rental

Hydratight offers the widest variety of bolting and machining tools from one trusted source. We are focused on providing complete operational flexibility, with a vast range of high performance products manufactured in-house and available for sale or rental worldwide.

The unique flexibility of the Hydratight approach is designed to ensure our customers receive totally satisfactory and cost-effective service at every stage. With our industry-leading product range, whether you choose to rent or purchase, you will experience outstanding value in both bolting and machining.

We work with our customers to understand their projects and to define the best solution for their needs, timeframe and location of work. Using the combined skills of our technical teams and advanced technologies such as our Bolt-Up software to analyse existing connections or determine tooling pressures, we can identify the master list of most appropriate torque, tensioning or machining equipment needed and procedures to perform safe and efficient work.

All of our products are meticulously inspected on a regular basis to ensure they meet both our stringent performance criteria and your critical facility needs. Our highly experienced specialist workforce offers the most comprehensive on-site technical services available today, providing high quality 24/7 site-based support. Their expertise is your assurance that Hydratight products will not just meet but exceed all your application needs.

Hydratight rental products include:

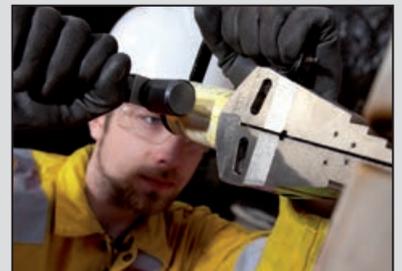

Bolting Products

- Topside and subsea hydraulic bolt tensioners
- Hand and hydraulic torque wrenches
- Power consoles
- Nutsplitters
- Flange spreaders
- Flange pullers

Machining Products

- Pipe-cutting, end-prepping and bevelling clamshells – cold work
- Grinding machines
- Milling machines
- Portable boring bars
- Flange facing machines

In addition to the extensive range of products available for sale or rental, Hydratight also offers specifically customised solutions designed to meet the most unique challenges. For more information, please contact your local sales representative or visit hydratight.com.
