Health & Safety Policy

March 2019

Enerpac is a global market leader in high pressure hydraulic tools, controlled force products and solutions for precise positioning of heavy loads.

Our experience, comprehensive product range and on-site service teams support our global customers via a network of strategically placed locations and a team of 2000+ employees.

The Leadership Team of Enerpac recognises that health and safety are core values that must be incorporated into all aspects of its business. Enerpac therefore aims to conduct its business in a way that presents no risk of injury or ill health to its employees, suppliers, visitors or customers; with no damage to plant, equipment, materials or any other property as a result of accidents, fires or dangerous occurrences.

This is a process of continuous improvement and relies primarily on the systematic identification, assessment and control of hazards and risks, underpinned by awareness of and compliance with relevant legislative and other industry requirements. Additionally Enerpac will set objectives and targets, and measure and monitor their achievement through regular inspections, audits and the thorough investigation of accidents and incidents. The success of this policy requires the involvement and commitment of everybody in the organisation, combined with strict compliance with Management System requirements.

Enerpac’s Leadership Team is committed to making available adequate resources to fulfill this policy, and places a primary responsibility on themselves and line management to ensure the implementation and maintenance of the health and safety management system, whilst ensuring that its staff are consulted and involved at all relevant stages.

Enerpac employs competent personnel and ensures they are provided with sufficient information, instruction and training to carry out their work activities and responsibilities in a safe manner. Every employee of Enerpac has a legal and moral obligation to co-operate in the day-to-day implementation of this policy and to take reasonable care for their own health and safety and the safety of other people who may be affected by their acts or omissions.

The Leadership Team will use their policy deployment tools to review this policy, the strategy, goals and objectives at an annual management review and commit sufficient resources to satisfy the requirements of ISO 45001: 2018.

This policy statement is available upon request to all interested parties.
